SUMMARY

As an Electrical Engineering graduate, I developed a passion for Computer Science and Artificial Intelligence while learning C programming, where I found coding deeply engaging and inspiring. This experience led me to explore software development and AI technologies, blending my engineering background with a strong interest in intelligent systems. Driven by curiosity and problem-solving, I aim to apply my programming skills and analytical mindset to impactful AI projects while continuously learning and growing.

PROJECTS

YOLO PROJECT – “SMART SAFETY HELMET AND VEST DETECTION SYSTEM ”

Tech: YOLOv8 ,OpenCV, Python

- Build a real-time safety compliance detector that identifies if a person on a construction site is wearing a helmet and reflective vest.

NLP PROJECT – “SMART RESUME SIMILARITY CHECKER.”

Tech: Sentence Transformers (All-Mini-L6-v2 or DistilBERT), FAISS / cosine similarity

- Create a resume-job match system that compares candidate resumes with job descriptions to find semantic similarity — not just keyword matching.

TaskFlow — a modern REST API built with FastAPI

Tech: FastAPI ,SQLAlchemy ,SQLite ,Pydantic ,Uvicorn,ASGI

- A modern REST API built with FastAPI that allows users to manage their daily tasks.
- A Features include CRUD operations, SQLAlchemy ORM integration, input validation with Pydantic, and automatic Swagger documentation.

EDUCATION

National Institute of Technology, Raipur

B.Tech in Electrical Engineering
Raipur, INDIA.

Tirumala Jr College, Rajamundry

Intermediate (CGPA: 10.0).

INDUSTRIAL TRAINING

Bharat Heavy Electricals Limited (BHEL)

- Observed generator manufacturing, assembly, and testing.
- Visited multiple production sections across the organization.

SKILLS

PROGRAMMING

Python • JavaScript • Java

AI/ML FRAMEWORKS

TensorFlow • PyTorch • Hugging Face Transformers

GENAI TOOLS

LangChain • OpenAI API • Stability AI • Hugging Face Spaces

LIBRARIES

NumPy • Pandas • Matplotlib • Scikit-learn

DATABASES

MySQL • MongoDB

PLATFORMS & TOOLS

Git • Docker • Streamlit • FastAPI

CONCEPTS

LLM fine-tuning • Prompt Engineering • RAG
NLP • GANs • Vector DBs (FAISS)

PERSONAL

Languages: English, Telugu, Hindi

Availability: Full-time

Notice Period: Immediate

2023

HOBBIES & STRENGTHS

Cricket (captained college team; CLR championship)

Fitness & outdoor sports

Communication & coordination

Positive, team-first mindset

CERTIFICATIONS

IBM AI Engineering Professional Certificate — IBM / Coursera (2025)

(Python, ML, DL, TensorFlow, PyTorch, Docker, MongoDB, FastAPI)

Generative AI with LLMs — DeepLearning.AI + OpenAI / Coursera (2025)

(Prompt Engineering, RAG, LangChain, Hugging Face, OpenAI API)

EXPANDED DETAILS

AI Image Generator (Stable Diffusion) — Prompt controls (including negative prompts) and style presets; served via FastAPI with a lightweight UI.

Summarization & Sentiment App — BART for summaries and DistilBERT for polarity; multi-document handling; real-time inference in Flask.

Banking Management System — Console workflows with OOP, validation, and robust exception handling; maintains transaction history and secure PIN checks.

Industrial Training (BHEL) — Exposure to the generator manufacturing lifecycle, quality checks, and test protocols.
